## EDIT0R'S PREFACE.

This Sixth Volume of the Catalogue of Oriental Coins in the British Museum deals with the money issued by the Mongol Dynasties descended from Jingis Khán, corresponding to Fraehn's Classes XVIII.-XXII. The only line of Kháns tracing their lineage to Jingis excluded from this volume is that of Sheyban or Abu-l-Kheyr, which was of late foundation and rose on the ruins of the Timurian empire. Timur's own coinage, with that of his house, is reserved for the next (or Seventh) Volume, since he was not a lineal descendant of Jingis. On the other hand, the issues of the small dynasties which divided Persia among them between the decay of the Ilkháns and the invasion of Timur are included in this volume as a species of appendix.

The metal of each specimen is stated, and its size in inches and tenths, as in the preceding volumes. The weight of the examples in gold and silver is stated in English grains, except in long series of silver issues of fairly uniform weight, such as those of the Kháns of the Golden Horde, when only the weights of typical specimens are given.

Tables for converting grains into grammes, and inches into millimètres and into the measures of Mionnet's scale, are given at the end of the volume.

Typical examples are figured in the nine plates, which are executed by the autotype mechanical process from casts in plaster.

The work has been written by Mr. Stanley Lane-Poole; and I have carefully revised it, comparing every coin with the corresponding description.

## INTR0DUCTION.

## I. HISTORICAL OUTLINE.

Some outline of the history of the Mongols is necessary for the clear apprehension of the mutaal relations of the various dynasties belonging to the family of Jingis Khán, whose coins are described in the Sixth Volume of the Catalogue of Oriental Coins in the British Museum. There is at present no work from which such an outline may readily be obtained. The older historians are not only prolix in what they relate, bat often confused and inaccurate; whilst in many important omissions they display a lack of discrimination between the essential and the trivial. Nor can the latest historian of the Mongols be altogether acquitted from the charge of prolivity and indistinctness, though the intricacy of the subject and the contıadictory accounts of the authorities may serve as a sufficient excuse for him as well as for his predecessors. Mr. Howorth has devoted an indomitable patience and extensive research to the elucidation of the devious history of the numerous clans and families that make up the Mongol race; and his work, the result of a relentless ransacking of all preceding authorities, will necessarily serve as the basis of every future inquiry. It is, however, an impossible book to skim, and not an easy one to master, even to a determined student. Mr. Howorth's long familiarity with his subject makes him a little inconsiderate towards his readers' ignorance, and the ease with which he traverses the pathless steppes in which his Mongols dwell renders him almost supercilious of the vagaries of those who essay to follow him. The complexity of the subject, moreover, has given occasion for certain rectifications as further
progress in the work rendered this or that obscure point more intelligible, and these rectifications are scattered in foot-notes in such a manner as not to be always obvious to the reader's attention. It requires, therefore, no small perseverence to conquer the difficulties of Mr. Howorth's history, especially as the Author, by an inadvertence too common among all writers, but particularly unfortunate in this instance, has omitted to supply either indexes or tables of contents to his three stout volumes of small type. I believe that few students can boast a thorough acquaintance with Mr. Howorth's History of the Mongols, and shall make no excuse, therefore, for the appearance of the following brief analysis of the results of a work in which the zeal and the patient research of the learned man-now a very rare phenomenon,-are so conspicuous as I have proved them to be by a somewhat laborious apprenticeship.

## i. The Foundation of the Mongol Empire : Jingis Khán.

The history of the Mongols begins practically with the great conqueror Jingis Khán. There are many traditions of his ancestors current among his biographers, but, as in the case of mauy another man of unexpected fame, his pedigree has been elaborated rather on the ground of natural propriety than of fact. 'The traditions about Jingis Khán's predecessors come partly from the imagination of the Lamas, who looked to his family for promntion, and partly from the copious traditional resources of the Turks, whom the Mongols subdued, and turned their folk-lore as well as their arms to their own proper service. All that can safely be said about the early history of the Mongols is that they were a clan among clans, a member of a great nomad confederacy that ranged the country north of the desert of Gobi in search of water and pasture ; who spent their lives in bunting and the breeding of cattle, lived on flesh and sour milk (kumis), and made their profit by bartering hides and beasts
with their kinsmen the Khitans, or with the Turks and Chinese, to whom they owed allegiance. The name Mongol was not known abroad until the tenth century, and probably came to be applied to the whole group of clans only when the chief of a particular clan bearing that name acquired an ascendancy over the rest of the confederacy, and gave to the greater the name of the less. If not the founder of the supremacy of his clan, Yissugei was a notable maintainer of it, and it was probably he who first asserted the independence of the Mongols from Chinese rule. In spite, however, of conquest and annexation, the people who owned the sovereignty of Yissugei numbered only forty thousand tents. Yet it was upon this foundation that Yissugei's son, Jingis Khán-patris fortis filius fortior-built up in twenty years the widest empire the world has ever seen. Yissugei died in 1175 A.d., and Temujin his son, a child of thirteen years, and not yet called by the high title of Jingis Khán, ruled in his stead over the tribes that wandered by the banks of the Onon.

A detailed chronicle of the career of conquest inaugurated by this Asiatic Alexander is no part of the present purpose. [See Howorth i. 49-115.] It is sufficient to say that after thirty years of struggle against home-foes, in which he succeeded in firmly establishing his authority over his own and the neighbouring clans, in face of powerful and treacherous conspiracies, Temujin found bimself free to devote the twenty years that remained of his life to wider and more ambitious designs. Having reduced all the tribes north of the desert of Gobi, from the Irtish to the Khinggan Mountains, and having incorporated among his subjects the Keraits [H. i. 534-589], who had forfeited their independence by the treachery of their king, Wang Khán (the Prester John of European fable, and an old but perfidious ally of Yissugei and his son), Temujin summoned, in LOO (a ; Kuriltai or Dint of the chiffs of all the tribes; and a shaman, or priest, announced to the anembled nobles that a
higher title than belonged to others had been decreed by Heaven to Temujin, and henceforward his name should be Jingis (or Chinghiz) Khán, 'the Very Mighty King.' Thus at the age of forty-four did Jingis begin his actual undisputed reign. Three years later, after receiving the submission of the Uighurs, he began his invasion of China, and though it was reserved for his grandson to complete the subjugation of the Celestial Empire, a great part of the northern provinces, the ancient kingdom of Liau-tung, and the Tangut Kingdom of Hia, were added, as subject provinces or feudatory states, to the Mongol dominions during the great Khán's own lifetime. The next obstacle in the path to universal sovereignty was the old Turkish kingdom of Kara-Khitai, which corresponded nearly to the modern limits of Eastern Turkestan, and was ruled by a line of kings called Gur-Kháne, who exacted homage from the border states of Persia and Transoxiana. Jingis and his horsemen, however, instead of paying homage, speedily rode down all resistance, and soon found themselves masters of Kashghár, Khoten, and Yarkand, with the rest of the territory of the GurKháns. The Mongol dominions now marched with the wide kingdom which had recently been spread out by the Khuwarezm Sháh; and this, therefore, became the next object of attack and the next example of the futility of resistance. The Mongol armies, divided into several immense brigades, ewept over Khuwárezm, Khorásán, and Afghanistán, on the one hand, and on the other over Adharbiján, Georgia and soathern Russia, whilst a third division continued the reduction of China. In the midst of these diverging streams of conquest, Jingis Khán died, in 1227, at the age of sirty-four. The territory he and his sons had conquered stretched from the Yellow Sea to the Crimea, from the Baikal Lake to Merv, and included lands or tribes wrang from the rule of Chinese, Tangats, Afghans, Persians, and Turks.

## ii. Division of the Mongol Empire.

It was the habit of a Mongol chief to distribute the clans over which he had ruled as appanages among his sons; and this tribal rather than territorial distribution obtained in the division of the empire among the sons of Jingis. The inheritance of the chiefdom over a tribe of nomads, instead of a definite territory, adds to the difficulty of obtaining a clear view of the subsequent history of the descendants of Jingis. But besides the complications arising from a moveable inheritance, the large number of dynasties belonging to this family renders a continuous study of the whole impossible; and we find ourselves obliged to follow a dozen different lines of rulers, reigning at the same time in widely scattered parts of the Mongol empire, but all alike tracing their origin to the great Jingis Khán. To arrange these various lines in a comprehensible order is the task I have set before me. Jingis not only appointed a special appanage of tribes in certain loosely defined campinggrounds to each son, but nominated also a successor to himself in the supreme Khánate. Beginning therefore with the lines of Khakaans, or supreme suzerains over all the other Mongol chiefs, the following order seems the natural one:
> 1. The line of Ogotai, ruling the tribes of Zungaria; Khakaans, till their extinction by the family of Tului.
2. The line of Tului, ruling the home clans of Mongolistan; Khakaans after Ogotai's line, down to the Manchu supremacy.
3. The Persian branch of the line of Tului; Hulagu and his successors, the Ilkháns of Persia.
4. The line of $J u j i$, ruling the Turkish Tribes of the Khánate of Kipchak; the Kháns of the Golden and White Hordes, with the sequel, the Khánate of Astrakhan, and the offshoots, the Khanates of Kazan, Kasimof, and Krim ; and finally the Khans of Khiva and Bukhárí.
5. The line of Jagatai, ruling Má-wara-n-nahr, or Transoxiana.

Besides these, less important appanages were allotted to Jingis Khán’s brothers. China and Persia were regarded as provinces, not great Khánates, at the death of Jingis; but China soon became the head-quarters of the line of Tului, and Persia was ere long ruled by a younger branch of the same.
iii. Line of Ogotai :-Appanage, Zungaria* (1227-1301);

Supreme Khakaans (1227-1248) ; pretenders to the Khakaanate (1257-1301). [H. i. 116-186.]

By the will of Jingis, Ogotai besides receiving his appanage in Zungaria was appointed to succeed to the supreme authority; and it is a singular testimony to the reverence in which the intentions of the great founder of Mongol power were held that Ogtotai, although neither the eldest nor the most capable of the sons of Jingis, was suffered quietly to assume the sovereignty over all the chiefs of the family and tributaries, and received their loyal homage at the general Diet held in a.d. 1229. His reign was marked by a considerable extension of the Mongol dominions. The Kin empire, or northern half of China, which had only been partially reduced in the lifetime of Jingis, was now (1234) entirely subdued : (the southern half, or Sung empire, resisted the invaders till the time of Khubilai.) Corea was annexed (1241). The gallant and unfortunate Jelal-ed-deen, son of the late Khuwárezm Sháh Mohammad, was hunted through the wide territory which had once owned his father's rule, until at

[^0]length he perished miserably by the hadd of an assassin. A great expedition into Europe was conducted by Batu, son of Juji ; the Mongols entered Moscow and Novgorod, penetrated to Hungary, burned Cracow, and laid siege to Pesth. The opportune death of Ogotai, calling for a general assembly of the family, and a reverse sustained at Liegnitz at the hand of the Grand Duke of Austria, saved Eurnpe. Meanwhile the internal affairs of the empire were organised and ably administered under the wise and just rule of the prime minister Yeliu Chutsai, a Khitan, who did much to restore order and security to the provinces, in spite of the incapacity of his imperial master, who was given over to the prevailing Mongol vice of habitual drunkenness.

Ogotai's death in s.d. 1241 ( A.H. 639) was followed by an interregnum of several years, during which his widow Turakina governed the empire as regent for her eldest son Kuyuk, until he should return from Europe, where he had been distinguishing himself in the invasion of Hungary under his cousin Batu. Of Ogotai's five sons, Kuchu had been designed for his successor, but, he dying before his father, Kuchu's son Shiramun was nominated heir. Turakina's influence, however, was supreme after the death of Ogotai, and she used it in favour of Kuyuk, who received a summons in Hungary and presently returned to Karakorum, and was elected Khakaan by a general Kuriltai in 1246, attended by most of the chiefs of the family, except the sons of Juji, who were dissatisfied with the succession and excused themselves. Kuyuk restored the tranquillity which had been disturbed during the rule of his mother, and armies were now despatched to continue the work of extension in China and Persia.

Kuyuk was the only member of the family of Ogotai who succeeded to the supreme throne, and on his death in 1248 the empire passed to the line of 'Tului, and neither Kuyuk's sons, nor any of his brothers, succeeded hiin. Under the first Khakaan of
the new line, the family of Ogotai offered no opposition to their dethronement: but when Mangu died and Khubilai was elected to the sovereignty by an informal Diet held in China, the discontent of Ogotai's descendants manifested itself in immediate and general revolt, and a series of disastrous campaigns ensued. [H. i. 173-186.] Kaidu, the son of Kashi, the son of Ogotai, asserted the right of the descendants of Jingis's heir to sit on Jingis's throne. He was supported by his own tribes,-the original appanage of Ogotai in Zungaria, which, of course, was not forfeited by the loss of the Khakaanship,-and also by the armies of Jagatai's Khánate by the Oxus, who did him homage as the legitimate representative of Jingis. Against this confederacy the house of Tului were able to lead the home-tribes of the old Mongol country, (the appanage of Tului), who had grown invincible in war by constant practise in Khubilai's Chinese campaigns, and were moreover the flower of the Mongol armies in the days of Jingis. The sons of Tului were also supported by the house of Juji in Kipchak, in the rear of Ogotai's appanage. Kaidu fought no fewer than forty-one battles with the supporters of Tului on the east, and fifteen with their Kipchak allies on the west: but the struggle was unequal, and soon after Kaidu's death (about $701=1301$ ) the family of Ogotai did homage to the line of Tului; their clans were dispersed among the tribes of Transoxiana and Kipchak, and their chiefs lived in obscurity under the rule of the Jagatai Kháns. Once and again, in a period of confusion, some representative of Ogotai's house was raised to the throne of Transoxiana (p. sxix) ; and it was the fancy of the great Timur to bring again to light the heirs of the heir of Jingis by setting up Suyurghatmish and his son Mahmood in the stead of the deposed house of Jagatai; but this was only a fictitious revival, and these two rois fainéants cannot be said to represent the original Khakaans of whom Kuyuk was the last in this family.
iv. The line of Tului :-Appanage, Mongolistan; Khakaans (1248-1634) in three stages, (1) Yuen dynasty in China (1248-1370), (2) Diminished empire at Karakorum (1370-1543), (3) Divided tribes and gradual sabmission to Manchus (1543-1634). [H. i. 187-496.]

Mangu, the son of Tului, owed his accession partly to his personal reputation as a warrior and general, and partly to the adherence of his own clans-the numerous tribes of Mongolia proper, the nucleus of the Mongol armies under Jingis, which formed the appanage of Tului and his house. In 1251 his inauguration took place, and in 1257 he died. Yet in this short reign there was room for the beginning of two important changes. Manga kept his court at the usual capital Karakorum, north of the desert of Gobi, and appointed his brother Khubilai governor of the southern provinces: this was the beginning of the transfer of the seat of government from Karakorum to Peking. The other change was the despatch of another brother, Hulagu, to Persia, where in place of the shifting rule of provincial governors he established his own dynasty, and thus Persia now possessed a line of kings of the royal house of Jingis, like the other great divisions of the Mongol empire.

The death of Mangu in 1257 was the signal for a general struggle. [H. i. 216 ff ] The house of Ogotai laid claim to the supreme sovereignty, as has been said; and Arikbuka, a brother of Mangu and Khubilai, was the candidate in the Mongol homeland. Khubilai was saluted Khakaan by the chiefs of the army in China ; Arikbuka was elected by another Diet at Karakorum; and Kaidu received the like title and homage from the tribes of Ogotai and Jagatai further west. Juji's line in Kipchak did not attempt to gain the Khakeanship, but supported the house of Tului. The fine generalohip, large resources, and wide personal popularity of Khubilai-Mareo Polo's "Great Khán"
and Coleridge's Kubla Khan-carried him safely through these early complications. Arikbuka was speedily routed, and Kaidu was kept at a distance, though he did not eease from troubling till after Khubilai's death.

The Khakaans of the blood of Jingis now became a Chinese dynasty. By 1280 , Khubilai had conquered the southern or Sung empire of Cbina, and, having thus united the whole country under his sole rule, tixed his court at Khán Baligh (Cambaluk), or the "City of the Khan," now called Peking; and the old capital Karakorum, though still his, became a provincial centre. This remained the case during the first of the three periods into which the history of the descendants of Khubilai may be divided. This first period includes the century which elapsed between the founding of the Mongol empire in China by Khubilai aud the expulsion of the invaders under his tenth successor, Tughon-Timur (1370). [H. i. 28.1-340.] The Mongol Kbakaans of this period are known in Chinese annals as the Fuen Dynasty. With what sumptuous glory this dynasty began we know from Marco Polo: the causes of its decay-the extravagance of the court, the favouritism of the Lamas, the poverty and sickness of the people, the plagues and famines, earthquakes and other 'signs'-may be read in Mr. Howorth's History. The attempts of various pretenders were crowned by the successful attack of Chu Yuen Chang, prince of $U$, the founder of the Ming Dynasty, who assumed the royal title and seized Peking in 1368. In two years China was rid of the Mongols; and the most prosperous period of the history of the Khakaans was over.

The second period extends from the expulsion from China to the temporary revival under Dayan Khán (1370-1543). [H. 1. 3+0-376.] This is the time of the Diminished Empire, when the Mongols were confined to the steppes from which they first went furth to conguer, the camping-grounds by the rivers Kerulun and Onum, north of the desert of Gobi. Even here
they were not absolutely independent. The Ming armies surprised the fugitive Mongols by the Lake Bayur-full of the memories of Jingis-and totally routed them, capturing $\mathbf{8 0 , 0 0 0}$ prisoners, lifting 150,000 head of cattle (the only source of wealth in the steppes), and carrying off an immense booty. This defeat effectually tamed the spirit of the Khakaans, sapreme now in name alone; and they became actual vassals of the Ming emperors, who appointed the rulers of the tribes by patents drawn up in Peking. In the 15th century a worse thing happened to them; many of the clans became for a while subject to the Uirats. But at the end of the same century Dayan Khán, the fourteenth Khakaan in succession from Toghon-Timur, effected a temporary union among the scattered tribes, and organized them in certain groups. The gradual relaxation of the Ming authority beyond the Great Wall had been followed by a general drifting-back of the Mongols from the country north of Gobi, to which they had been driven, to the tracts south of the desert, between it and the Great Wail of China. This is now the land of the Chakhars [H.i. 384-388] and the Forty-Nine Banners [H. i. 388-452], who comprise all the tribes south and south-east of the desert; whilst north of the desert, in the homeland of the Mongol race, dwell the Khalkas [H. i. 455-496]. The Chakhars, Khalkas, and the varions tribes incorporated in the Chinese military organization of the Forty-Nine Banners, are the Nuruns or 'Children of Light,' the original Mongol tribes who went conquering with Jingis, were carried to China by Khubilai, driven back to Karakorum under Toghon-Timur, and again were spreading out and strengthening in the days of China's weakness. Their names, however, are not those which they bore in the time of Jingıs, but were probably adopted from local associations abont the time of Dayan Khán's organization, since when they have not materially changed. The organization consisted in grouping them in large brigades, called Tumens. There were six of these :
three called Imperial, Western, Segon or Right, Tumens, and consisting of (1) the Chakhars and affiliated tribes, (2) the Khalkas, (3) the Uriangkbans (who rebelled and were presently dispersed among the other five Tumens): and three called Vice-regal, Eastern, Baraghon or Left, Tumens [H. i. 399-434], and consisting of (1) the Ordus (or Pretorians of the Khakaan), (2) the Tumeds, (3) the Jungshiyados (or Karatshins). The Segon Tumens were governed by the Khakaan himself, the Baraghon by a Viceroy or dauphin (called Jinong), who was generally a son or brother of the Khaksan. There was also an additional or irregular Tumen, called the Khortshid Tumen, which comprised nine tribes of the Forty-Nine Banners, not included in the preceding Tumens, and all ruled by descendants of Juji Khassar, a brother of Jingis. One tribe, the Ongninghods, still acknowledged the line of Temajin Utsuken, another brother of Jingis, who had received an appanage among the tribes of the extreme east. With this temporary reunion, and the death of its author Dayan Khán in 1543 the second period ends.

The third period is the bistory of the disastrous results of Dayan's decentralizing policy-civil war among the Divided Tribes, and the consequent absorption of them one by one by the Manchu power which had newly risen on the ruins of the Ming in China: 'Divided among the sons of Dayan Khán, Mongolia was what Russia was in the thirteenth century, a disintegrated body of units whose matual jealoasies were probably not diminished by their rulers being near of kin.' [H. i. 376-496]. The Segon and the Baraghon Tumens fell out with each other and among themselves; internal wars, separate dynasties, and universal disunion, soon brought even the nominal sovereignty of the Khakaan to an end. Lingdan, indeed, tried to revive and reunite the ruined empire, but he and his Chakhars were defeated by the Baraghon Tumens, the Manchu ascendancy was gaining ground, and after 1634 the
house of Khubilai had become merely vassals of the dynasty that ruled in China where they had once ruled, and the ' Children of Light,' who had known the leadership of Jingis and had seen the 'stately pleasure dome' which Kubla Khán decreed, now possess nothing but trivial tribal annals, as uninteresting as the history of the Scottish clans.

## v. The Persian Branch of the Line of Tului:-Appanage, Persia ; Dynasty of the Ilkháns, or House of Hulagu. ( $654-750=1256-1349$ ).

It was in the reign of Mangu that Persia, after suffering the misrule of governors appointed by the Khakaans of Karakorum, was given a royal dynasty for itself in the House of Holaga, called that of the Ilkháns, or provincial Kháns, to indicate the homage they owed, and invariably acknowledged, very cheaply, to the Khakaans of Mongolia and China. Hulagu had little difficulty in establishing his authority over the country allotted to him. The ambitious Sháh of Khuwárezm whom Jingis had defeated had already cleared the way by conquering the better part of Persia, and there were no formidable opponents to meet. Hulagu speedily drove before him the small princes who were trying to build their little dynasties on the ruins of the great empire of Khuwárezm ; came to Baghdad and cruelly murdered El-Mustaagim, the feeble representative of the 'Abbásee Khaleefehs; and discovered no serious obstacle in his patb till he was checked in Syria by the raliant Memlooks of Egypt, who kept him successfully at arm's length. Hulagu was now master of all the provinces of Persia and Asia Minor from India to the Mediterranean. His dominions marched with those of Jagatai and Juji on the north, and with the territory of the Egyptian Sultáns on the south; and within these limits for nearly a century his dynasty reigned in practical independence, whilst rendering a certain feudal homage to the
remote Khakaan in China. The bistory of the Ilkháns presents little difficulty to the stadent, except in the last ten years. Save for an occasional contest over the succession, the country was quietly and peaceably governed, and the Ilkháns showed a praiseworthy desire to emulate the examples of earlier rulers of Persia in the encouragement of science and letters.

In the reign of Aboo-Sa'eed, however, the dynasty was undermined by the same causes which had previously destroyed the power of the Khaleefehs and the Seljooks, and were destined soon to bring about the downfall of the Memlooks in Egypt. Rival Ameers, generals, ministers, fanatics, began to take a large share in the government of the country, and in their jealousies and animosities lay the prime danger of the Ilkhans. Aboo-Sa'eed died without making an effort to cut at the root of the influences which were undermining the authority of his dynasty, but on the contrary declaring that there was no one left of the line of Hulagu worthy to reign. After his death the throne of Persia became the toadstool on which the puppet sovereigns set up by rival ameers seated themselves only to find it crumbling beneath them. Two great houses tore Persia in sunder : that of Ameer Chupán, a favourite general of Gházán and of his successors; and that of Ameer Hoseyn the Jelair, also called the Ilkhanian. Each of these had a son named Hasan, distinguished by the epithets Great and Little; the son of Chupán was Ameer Hasan Kuchuk or the Little; and the son of the Ilkhanian was Ameer Sheykh Hasan Buzurg or the Great. Their power was almost immediately felt. Arpa Khán, a descendant not of Hulagu but of Arikbuka his brother, was placed on the throne after Aboo-Sa'eed's death, but was deposed the same year (A.н. $736=$ A.d. 1336) by Moosí, who drew bis pedigree from Hulagu by way of Baidu the sixth Ilkhán. Moosá was quickly displaced by Mohammad, the nominee of the Greater Hasan, whose rival of the line of Chupán presently sat up an opposition in the sovereignty in the person of Sati-

Beg, a sister of Aboo-Sa'eed, who had been the wife of Chupán, then of Arpa, and was finally married to Suleyman, who supplanted her in the supremacy, at least in name. (See note, p. 4.) The following table of contemporary Ilkháns will explain the confusion of these last ten years of the Persian Branch of Tului's line.

## NOMINEES OF THE RIVAL AMEERS.

Of Hasan Buzury.
Of Hasan Kuchuk (and his brother).

Mohammad, 736
(d. 738 ).

Arpa, 736.
Of other Ameers. Moosá, 736.

Toghé-Timur, 737-752
(in Khorásín).

Togha-Timar, 739 (pro-
viously proclaimed in Khorásán; retreate thither in same year, 739).

Jehán-Timur, 739.
Suleymén, 840.
to 741 .
Nushirwán, 745-754?

After the troubled reign of Nushirwán the Jelairs were the chief power in Persia, and the dynasty of Hulagu became extinct. The Jelairs, Mudhaffarees, Serbedarians, \&c., made havoc of the country till the great Timur came and swept them away for awhile.
vi. The Line of $J u j i$ :-Appanage, Karakhitai and Kipchak; Kháns of the Golden Horde ; of the White Horde, of Astrakhan; Kazan, Kazimof, Krin, Tiumen, Khiva and Bukhárá. [H. ii. 1- 1057.]

To Juji, the eldest son of Jingis, were as ;ned the tribes of the old empire of Kara-Khitai, north of the Sihun or

Jaxartes, and here he, dying before Jingis, was succeeded by his eldest son Orda. A younger son of Juji, Batu, by his famous invasion of Europe, extended the appanage of his family much further to the weat, and secured for himself the sovereignty of the Turkish Khánate of Kipchak. North of Batu's territory, another brother, Tuka-Timur, appears to have been allotted the district of Great Bulgaria, on the Upper Volga; a fourth son of Jaji, Sheyban, ruled the steppes now known as those of the Kirghiz Kazaks, north of Orda's appanage, and a fifth, Teval, led the Pechenegs, afterwards known as Nogais, between the Ural and Yemba. All these tribes and their chiefs were more or less subject to the family of Batu, which, although a younger branch, had acquired the greatest power and had made their capital Serái on the Volga the metropolis of the Jajide empire; and all these tribes are included in the general name Golden Horde, so-called from the Khán's royal camp, Sir Orda or Golden Camp. It must be added that only the ruling family and the cream of the army were of Mongol race : the vast majority of the tribes allotted to the sons of Juji were conquered Turks or Turtomans; and hence Mr. Howorth calls these western divisions of the empire of Jingre ' the Tartar Dynasties.'

The family of Juji bas, therefore, to be considered in the following distinct lines:-
A. The line of Batw, chief Kháns of the Golden Horde, ruling the Blae Horde in Weatern Kipchat (1224-1359).
B. The line of Orda, titular head. of the family, ruling the White Horde in Eastern Kipchak (1226142ヶ), and Kháns of the golden Horde in Weatern Kipchat after Batu's hine (137's-1502), and finally decaying as Kháns of Astrakhán (1466-1554).
C. The line of Tuka-Timur, Kháns of Great Bulgaria, north of Kipchak ; occasional Kháns of the Golden Horde in Western Kipchak ; finally Khśns of Kazan (1438-1552), Kazimof ( 1450 -1678), and Krim (1420-1783).
D. The line of Sheyban, in the Uzbeg or Kirghiz Kazak steppes (1224-1659); afterwards migrating and becoming Kháns of Khiva and Bukhárá
A. The line of Batw:-Chief Kháns of the Golden Horde; appanage, the Blue Horde in Western Kipchak, (the country watered by the Don and the Volga, extending east and west from the Ural or Yaik to the Dnieper, and north and south from the Black Sea and Caspian to Ukek,) 1224-1359. [H. ii. 36-194.]
Batu's line had the privilege of ruling what was emphatically the Great Khánate of the west. Its history is important in its relations with the growth of Russia. At first the liegelords of the Russian princea, receivers of their tribute, and owners of their daughters, it was the fate of the Great Kháns of Kipchak eventually to become the vassals of those whom they had once held in bondage. Hat before this stage in the decay of the Golden Horde, Batu's line had become extinct, and the Kháns had been supplied from bis brothers' families. So long as the descendants of Butu held the reins of government, the great domain of the Khenate of Kipchak, conquered by Batu [H. ii. 36-91] and strengthened by his brother Bereke [H. ii. 103-125], was maintained in all its power. The history of Batu's line, through ten K'bans, to Berdibeg the son of Janibeg, is comparatively plain. But Janibeg was the last great ruler of this branch of Juji's faucily, and on bis death (in 1357) anarchy ensued. His son Berdibeg reigned for two years, and troo K liáns amerting themselve to be sons of Janibeg
succeeded in a single year, and then follows a period of twenty years of rival candidates during which it is almost impossible to arrive at any connected history.

Mr. Howorth entitles the chapter (ii. IV.) which deals with this intricate period thi Rival Families, and it will be well to recapitulate the various branches of Juji's house from which candidates for the Golden Khánate might spring, on -the extinction of Batu's line. North and south, in Great Bulgaria and the Krim, ruled the numerous progeny of Tuka-Timur. South also, by the Caucasus, camping along the Terek and Kuma, were the descendants of Bereke. East of the Great Khánate was the White Horde with its chiefs of the family of Orda; and also east, but further north, were the Uzbeg tribes of Sheyban's leading; whilst along the northern shore of the Caspian the clans of Nogai pastured their herds.

Fourteen Kháns of one or other of these families reigned in Kipchak during this obscure period of twenty years [H. ii. 195-216]. Most of them struck coins, and struck them at the same mints, and it is evident that there must often have been two or three Kháns ruling contemporaneously in one part or another, and alternately seizing, and being expelled from, the capital city. The coinage (almost the only historical evidence we possess at this period) of Kildibeg, for example, overlaps that of Murid, Pulad and 'Azeez are overlapped by 'Abd-Allah, and Khaghan-Bey by Mohammad Bulak. The lineage of most of these Kháns is wrapped in complete darkness. The Khizr Khán who appears upon the scene first after the extinction of Batu's house is believed to be of Sheyban's line, and to the same stock certainly belonged Pulad, Ilban, Khaghan, and perhaps Tulun-Beg. On the other hand, Mamai, a member of the Nogai brauch, had assumed the function of king-maker in favour of a separate line of Khans, most of whom bore the title Khojah: and these Mr. Hownrth now believes to have belonged to Orda's stock. and not (as stated in his History) to that of Tuka-Timar. In the milist if ennjecture and olvenrity, I venture to hazard the
subjoined scheme of contemporary Kháns during the twenty years succeeding Berdibeg's death. To explain the grounds upon which it is founded would occupy more space than can be spared; but an investigation of Mr. Howorth's laborious collection of all obtainable facts on the subject will probably clear up any doubts as to the reasons which have guided me. Mr. Howorth himself does not attempt to draw up a connected list ; and the extremely scanty grounds for any such list justify his reticence. At the same time I believe a careful study of the coins will give some strength to the hypothesis of continuous lines of at least two families set forth in the following table :-

## FIRST PERIOD OF RIVAL FAMULIES.

It will be observed that this table differs in several instances from Mr. Howorth's arrangem.nt wheh however is put forward In whesitating + mammer, hy reason of the obseurity of the periond, that it is pessoble the anthor hmerle does mot lay great stress
upon every detail. Kildibeg (whom in spite of Mr. Howorth's reasoning [ii. 181] I cannot identify with Kulna), may have been a son or pretended son of Janibeg, like Kulna and Nurusbeg: for the attribution of both 'Azeez and Kildibeg to 'Tuka-Timur's line is merely conjectural. The Hasan who seized Serái in 768, and exactly fills the gap indicated by a star in the Sheyban line between Pulád and Tulun-beg, ought to belong to Sheyban's family: but Mr. Howorth's argument [ii. 207, 36] in favour of his being the father of Ulugh Mohammad and a descendant of Tuka-Timur appears to me too strong to be thrown over in favour of the convenience of a theory. He was apparently Khán of Great Bulgaria, whence he was driven in 768, only to seize Serái on the death of Pulad, and reign Khán of the Golden Horde till about 772, after which he reoccupied his former Khánate.

In 780, when both the principal lines of the preceding table came to an end, the sovereignty of the Golden Horde passed into the family of Orda in the person of Toktamish, who conquered Mamai and his protégé Mohammad Bulak, and presumably drove away 'Arab Sháh, unless, as appears probable, the latter's coinage in Kipchak merely indicates a temporary iuvasion.
B. The Line of Orda:-Titular heads of the family of Juji: Appanage, the White Horde in Eastern Kipchak (the country of the Lower Jaxartes and the Ulugh and Kuchuk Tag Mountains: bounded on the west by Batu's Blue Horde, on the north by Sheyban's Uzbega, on the east by Jagatai's Khánate, on the south by the destrt of Kizil Kum and the Alexandrofski range). 1226-142s; Khans (ff the Golden Horde in Western Kipelank, 13601502 ; finally. Kháns of Astraklain, $1466-1554$ [ H :1 216-362]

Although Batu was the most powerful of the sons of Juji, Orda the eldest inherited his father's appanage hy the Jaxartes, and received a special homage as hereditary head of the family. He ruled the left division of the Golden Horde, known as the White Horde (Ak Orda), (a colour which ranked higher than the Blae, ) in distinction from the right wing, Batu's tribes, which were designated the Blue Horde (Kok Orda) in token of imaginary dependence. Living in the far-away steppes beyond the Caspian, the White Horde soon yielded the palin to its Blue brethren on the Don and Volga; but in its rough wintry life it retained a vigour and hardihood which eventually placed its rulers on the throne of the more civilized and decayed descendants of Batu.

Of the earlier rulers of the White Horde little is known. Orda, Kuchi, Bayan, Sasibuka, and Ebisan, passed the Khánate regularly from father to son; and the only noticeable fact is the possession by Kuchi of a territory at Ghazneh and Bamian [H. ii. 219] under the suzerainty of either the Jagatai Kháno or the Ilkháns of Persia, for the frontier between the two dynasties was a matter of frequent dispute. Ebisan was followed by his brother Mubárak Khojah, the first of the rulers of the White Horde who is known to have issued a coin : it was struck at Sighnak in 729 or 739, A.H. It seems probable that the five Kháns (three of whom bore the title of Khojah) who ruled in Kipchat during the first period of rival families were descendants of Mubárak Khojah. Chimtai, son of Ebisan succeeded his uncle, and Chimtai's son Crus Khán is the first chief of Orda's line who possesses any individuality in the history of the White Horde He had the distinction of defeating the troops of Tinur more than once Timur in his overbearing fashion had appointed to the sovereignty of the tribes of Juin's appanage a membur of Orda's family, Toktamuh [ H . ii 2!2]. whose father had been killed and he .humself exiled by Urus $k$ hin Asonted hy the troops supplied
by Timar to carry his nomination into effect, Toktamish sustained several repulses at the hands of Uras, and it was not till after the death of this Khán and the short reign of Toktakia his son that Toktamish was able to wrest the command of the White Horde from another son of Urus, Timur Melik.

Toktamish [H. ii. 225-259] is 'the last really great figure in the history of the Golden Horde.' After seizing the throne of the White Horde he marched upon Western Kipchak, defeated Mamai, the king-maker of Serái, and by this victory in $780=1378$ [H. ii. 216, 226] put an end to the division between the White and the Blue Hordes, and united Eastern and Western Kipchak under his sole rule. Henceforward Orda's family, the original chiefs of the White Horde, sit in the seats of Batu's house and rule the Blue Horde, bringing no doubt the cream of the White Horde with them; and their original camping-grounds gradually pass into the bands of the descendants of Sheyban. Under Toktamish the Golden Horde recovered much of the prestige which the twenty years of rival families had weakened. A great campaign was carried into Russia, Moscow was sacked and burnt (1382), and the Grand Principality was ravaged with the ancient fury of the Mongols [H. ii. 226-228]. This revival of the glory of Kipchak, however, was only the flicker of a dying torch. Toktamish had the misfortune or the ingratitude to quarrel with the prince, who had helped him to his success; and no one offended Timur with impunity. The great conqueror in two campaigns, one marked by the battle of Urtupa on the 18th June 1391, and the second by a crushing defeat near the Terek in 1395, when Toktamish had returned from exile, destroyed for ever the power of the Kháns of Kipchak. [H. ii. 246-249, 251-258]. Toktamish indeed re-entered Serál in 1398, after Timur's departure, but he was speedily driven out again by Timur Kutlugh, son of his old enemy, Urus, and first of the Kháns of the Golden Horde
during the succeeding period of decline. Toktamish took refuge with the Lithuanian prince Vitut, whom he involved in war with the Tatars; and finally died in 1406 . [H. ii. 262]. There is a difference of opinion among the authorities as to the lineage of Toktamish : some trace him to Orda, others to Tuka-Timur. Mr. Howorth (ii. 225) inclines to the latter view, and argues that Toktamish could hardly have belonged to the family of Orda, because he was constantly waging war against it in the persons of Urus, Timur Melik, and Timur Kutlugh. This, however, is easily explained by the circumstance that Urus killed Tuli Khojah, the father of Toktamish. Hostility to Uras and his family does not exclude the idea of kinship: indeed such rivalry is the more comprehensible between two branches of the same house. There is, moreover, a difficulty in understanding why 'Tuli Khojab, as a descendant of Tuka-Timur, should be an obstacle in the path of Urus Khán's ambition [H. ii. 221], and thus require to be put out of the way; or, indeed, why Tuli Khojah and his son Toktamish should be at the orda of Urus at all, instead of among Tuka-Timur's posterity in Great Bulgaria or the Krim. All these difficulties disappear if we regard Tuli Khojah as a rival chief of Orda's family, perhaps a grandson of that Mubárak Khojal who was succeeded not by his own sons but by his nephew, Chimtai, father of Urus. It seems to me clear that Toktamish must have been a member of the White Horde, from which he was banished, to which he laid siege, which he finally ruled and led to conquest in the west: and I am glad to find that a note of Mr. Howorth's [ii. 1073] suggests the possibility of his conversion to the same opinion.*

The period succeeding the overthrow of Toktamish is one of the most obscure in the labyrinth of dark passages which the

[^1]history of the Golden Horde affords. In the interval between Timur's two victories over Toktamish several chiefs of Kipchak appear to have assumed sovereign rights and issued coins. One of these, Beg Pulad, seems to have established some authority [H. ii. 249], whilst Tash-Timur, apparently a brother of Ulugh Mohammad and a descendant of Tuka-Timur [H. ii. 449], struck coins bearing his name conjoint with that of Toktamish. [H. ii. 259]. The second invasion of Timur drove away these chiefs, and henceforward, just as in the period succeeding the extinction of Batu's line, we find the history is made up of the long struggles of Rival Families for the throne. There were at least three distinct sets of candidates for the decayed Khánship : on the one hand, the family of Urus Khén, supported by the Nogai chief Idikn, the second king-maker of Kipchak; side by side with these were the sons of Toktamish, who, however, did not begin to assert themselves till after their father's death, in a.d. 1406 ; and third, some younger members of the family of Sheyban. To the first class belonged Timur Kutlugh, Shadibeg, and Pulad,* all grandsons of Urus Khán ; Timur, son of Timur Kutlugh, a certain Chekre, presumably a relation, and Ghiyath-ed-deen, son of Shadibeg. Even among these the dates as established by the coins overlap, and Timar seems to have reigned contemporaneously with Pulad. Parallel with these Kháns of the family of Urus, but beginning later, four sons of the rival branch of Toktamish, but still descendants of Orda, successively held some portion of the Khánate, and issued coins,-Jelál-ed-deen, Kerimberdi, Kibak, and Jebbarberdi. Of the family of Sheyban, Dervish Khán, son of Háji1 Mohammad, struck coins from 1.н. $S 05$ to 818, and probably reigned till 822, and his. brother, Seyyid Aḥmad,

[^2]ruled after hin for a couple of months. The line of Urus Khán, however, outlasted the other two, and after 830 seems to have been the only power in the Khánate. The death of Idiku, in 825, released the house of Orda from the trammels of tutelage, and Kuchuk Mohammad, who succeeded his cousin Ghiyáthed-deen [H. ii 1075], found himself for the moment sole master of Kipchak.

An interruption, however, very shortly occurred in the invasion of Borak Khán. It must be stated that after the downfall of Toktamish, Timur Kutlugh only acquired the throne of Western Kipchak, and another member of the family of Orda, Koirijak, succeeded to the eastern portion of Toktamish's dominions, the camping-grounds of the White Horde, Orda's original appanage. Here his son Borak followed him [H. ii. 259, 273-4, 1075], and in 827 invaded Kipchak and defeated Kuchak Mohammad, without, however, destroying all his power. Being called away to affairs on his eastern frontier, Borak's place appears to have been filled by Devletberdi [H. ii. 274, 449], a son of Tash-Timur (of the line of TukaTimur), who divided Western Kipchak with Kuchuk Mohammad. Borak returning drove away Devletberdi, and was in turn defeated and killed by Kuchuk Mohammad ( $831=1428$ ), who now began his actual reign. Borak was the last of Orda's line to rule in Orda's original appanage of the White Horde. His descendants were superseded by the family of Sheyban, notably Abu-l-Kheyr, and migrated further east and became chiefs of the Kazaks. At the time of Tiarka, who died in 1718, the present division of the Kazaks into the Great, Middle, and Little Hordes, was organized, since when they have become more or less subject to Russia [H. ii. 627-685].

Meanwhile the family of Kuchuk Mohammad brought the histury of the Golden Horde to its close. An attempt on the part of Ulugh Mohammad, the Khán of Great Bulgaria, of the race of Tuka-Timur, to conquer the Kipchak Khánate was accom-
modated by an arrangement whereby he was allowed to retain the Krim (see pp. xxxiv, xxxv). With this exception the house of Kuchuk Mohammad, i.e. of Orda, held the dying Khánate of the Golden Horde down to the time of its absorption by Russia in 1502 (907).

The following table will give a clearer idea of this confused period of contemporary Kháns of rival families. It must be remarked that the rival Kháns not only ruled simultaneously in Kipehak, but held the same cities in the same years. The history of Serail and other large towns must have been the record of continual sieges and recaptures. In the earlier period of rival families (see $p . x x v$ ). the case was the same, and in that period the constant alternation of Kháns is well illustrated by the coins in the National Collection: as when we find Berdibeg, Kulna, Nuruz, and Khizr, all striking coins at Azák in 760; and Khizr, Timur Khojah, the anonymous Ordu Melik, and Kildibeg, all issuing coins at New Serái in 762. The coins of the second period of rival families, as represented in the British Museum, are unfortunately to a large degree deficient in dates; but the number of Kháns who struck in the same year at the same mint may be seen in the valuable numismatic summaries which Mr. Howorth judiciously appends to his account of each Khán. A still wider generalization may be looked for in M. Grigorieff's forthcoming treatise in the Numismata Orientalia.
SECOND PERIOD OF RIVAL FAMILIES.
FAMUY OF SESYBAN.
Dervish,
Seyyid Ahmad, 822.
805-822.
FAMILY OF TUKA.TIMUR.
Devietberdi (in the sbeonce
of Borrak), 890.

This is the end of the Golden Horde. Henceforth the history degenerates into the petty annals of its scattered fragments. Of these one alone belonged to the family of Orda : this was the direct heir of the great Khánate of Kipchak, the diminished aud insignificant Khánate of Astrakhín [H. ii. $349-362$ ], founded by a grandson of Kuchak Mohammad, Kásim, son of Maḥmood, in about 1466 , and retained in his family until its abolition in 1554 by the Grand Prince of Moscow, who had long held the petty Kháns in his power. The other fragments of the Golden Kbánate, the lines of Krim, Kazan, and Kazimof, belong to the house of Tuka'Timur.
> C. The Line of Tuka-Timur:-Appanage, Great Bulgaria, and subsequently Krim and Kaffa; occasional Kháns of the Golden Horde; finally, Kháns of Kazan, Kazimof, and Krim. [H. ii. 198-216, 274, 363-626; cf. esp. 1074-5.]

Tuka-Timur was the youngest son of Juji, and was attached to the left (or Orda's) wing of the Golden Horde, but probably had his own camping.grounds on the Upper Volga, including part at least of Great Bulgaria. Almost nothing is known of this branch in its original seats. Mangu-Timur (of Batu's line) gave Ureng-Timur, son of Tuka-Timur, Krim and Kaffa, and the family being thus established north and south of Batu's Khánate soon began to interfere in its dynastic succession. We have seen bow three Kháns of the first period of rival families belonged probably to Tuka-Timur's line, and one of the second period. But the chief importance of this branch is after the downfall of the Golden Khánate, which followed upon Timur's invasions. It is tolerably clear that the Hasan, who struck coins at Serái a little before the arrival of Toktamish, was, both before and after inis invasion of Kipchak, ruler of Great Bulgaria,
whence he had been expelled by the Russians and whither he returned quickly, only to be again expelled by Timur. At this time he is spoken of as ruling conjointly with his son Mohammad, whom Mr. Howorth, on strong evidence, identifes with Uiugh Mohannmad. This Ulugh Mohammad was apparently invited to take the throne of Kipchak on the death of Dervish Khán, but it is not clear that he ever ruled the Golden Horde [H. ii. 1073], and it is certain that he could not have held it for any considerable time, as Ghiyáth-ed-deen speedily occupied it, and Ulugh Mohammad took refuge with his kinsfolk in the Krim. Again he attempted to seize the Great Khánate after Borak's defeat and death at the bands of Kuchuk Mohammad, but the latter, after a long struggle, compromised the contest by assigning the Krim to his rival (although Taka-Timur's family appear to have held it, perhaps as vassals, from the days of Ureng). Ulugh Mohammad did not remain long in the Krim, but leaving it to his brother's house betook himself, in 1438 , to his old possession of Great Bulgaria, and there revived his father's (and perhaps his forefathers') Khánate, under the title of Khanate of Kazan [H.ii. 363-429], which, no longer overshadowed by the Great Khánate on its south, became an independeat thorn in the side of the growing Muscovite giant. With the death, however, of Mohammad Ameen, in 1519, the Mohammadan posterity of the founder of Kazan came to an end, and Kháns of the true faith had to be transplanted from the Kazimof, Krim, Astrakhán and other stocks, ander the auspices of Russia, who finally suppressed the Khánate and appointed a Rassian governor of Kazan in 1552.

When Ulugh Mobammad was murdered by his son Mahmoodek, in 1446, two of his other sons fled to Russia, and after some service in the Muscovite army one of these, Kásim, was granted the town and district of Gorodetz on the Oka, in the division of Riazan. He gave the town his own name, and the line of Kháns ruling here, and known as the Khins of Kasimof
[H. ii. 429-438], were used by Russia to play off against their powerful neighbour at Kazan, and were allowed to supply a couple of Khans to the greater Khanate on the extinction of Ulugh Mohammad's direct Muslim line. This Khanate, which never had a really independent existence, was re-absorbed by Russia in 1678.

The most important of the three Khánates sprung from the house of Tuka-Timur was that of the Krim. Ulugh Mohammad had a brother (at least so the balance of evidence leans), Tash-Timur, who was once a general under Toktamish, and struck coins in the Krim at the time of the second invasion of Timar-leng. Tash-Timur was the actual founder of the powerful dynasty of the Khains of the Krim or Crimea [H. ii. 448626], though his son, Hajji Girai, is generally regarded as the first Khán. The Krim dynasty was always a vital element in the Eastern Question, and as an outpost of Turkey or an ally of Russia was an object of the highest consideration on both sides. The history of the long list of Krim Kháns (cp. infra, p. 192) is perhaps the clearest and most complete section in Mr. Howorth's great work. During the later phase of the Khánate its rulers became dependent upon Turkey; and this proved the beginning of their ruin. The inconvenience of these violent neighbours was agreed between Russia and Turkey, and the Khánate of Krim was extinguished by a treaty in 1783. A lineal descendant of these powerful Kháns, one Sulṭán Krim Girai Katti Girai, settled in Edinburgh and married a Scottish lady.*

> D. The Line of Sheyban :-Appanage, the Uzbeg or KhirghizKazak country (between the Ural and Chu rivers) ; occasional Kháns of the Golden Horde;

Kháns or Czars of Tiumen, circ. 1225-1659; Kbáns of Bukhárá, 1500-1868, and of Khiva, 1515-1872. [H. ii. 978-1010, 686-977].

When Batu invaded Hungary in 1240, his brother Sheyban accompanied him, and quitted himself so well that Batu not only made bim King of Hungary, a title of a somewhat nominal value, but gave him an appanage of certain tribes north of Orda's Khánate. Sheyban was to camp in summer from the Ural mountains to the rivers Ilek and Irghiz, and in winter about the lands watered by the Sir, Chu, and Sarisu [H. ii. 978]. His descendant in the sixth generation, Mangu-Timur, was a contemporary of the great Khán Uzbeg of the Golden Horde, and from him the tribes of Sheyban's appanage took the name of Uzbegs, which has since become famous. On the extinction of Batu's line, the family of Sheyban supplied several Kháns to the Golden Horde (vide suprà, pp. xxv., xxvi.). Khizr Khán and his son Merdud were probably of this stock; Pulad and Ilban were doubtless the sons of Mangu-Timur of those names; Khaghan-Beg again was a son of Ilban; and TulunBeg is perhaps to be identified with Tanka-beg Kundi, another son of Mangu-Timur. [H. ii. 980.] In the second period of rival families, after the overthrow of Toktamish, the house of Sheyban is represented, in all probability, by Dervish Khán and Seyyid Ahmad, who seem to have been great grandsons of Tunka-beg Kundi. [H. ii. 980, 273].

The home-line of Sheyban [H. ii. 980-1010] remained in the original camping-grounds and assumed the title of Czars of Tiumen, under which they were obeyed over a great part of Siberia. They survived till 1659, when their country was occupied by the Kalmuks : but for some time before this their authority had been purely nominal.

Much more important were the branches descended from Pulad, son of Mangu-Timur, and once ruler of the Golden Horde. Pulad's two sons, Ibraheem and 'Arab-Sháh, were respectively
the founders or the Khánates of Bukhárá [H. ii. 686-816] and Khuwárezm or Khiva [H. ii. 876-977]. The former was founded by Mohammad Sheybani, grandson of Abu-l-Kheyr, who was grandson of Ibraheem, in 1500, and survives to the present day, although General Kaufmann has made it a Russian dependency since 1868. 'Arab-Shah, the founder of the Khánate of Khiva, is also known as, if not a Khán of the Golden Horde, at least a striker of coins in Kipchak just before the invasion of Toktamish (suprà, pp. xxv., xxvi.). His descendant in the fifth generation, Ilbars Khán, took forcible possession of Transoxiana and adjacent provinces after Sheybani's death, probably about 1515, and his posterity remain Kháns of Khiva at the present day, though they have been tribatary to Russia since 1872. The history and coinage of these Khánates, which sprang up on the ruins of the empire of Timur, belong to the succeeding volume, where also the fragments into which the Khánate of Bukhárá broke when the central power became weak will be discussed.

It should be added that annther son of Juji, Teval, was the chief of the Pechenegs, camping about the river Bug in Southern Russia, and was the grandfather of Nogai, who took a large part in the affairs of the Golden Horde, but afterwards fell out with Toktu and was driven, along with his tribes, who adopted the name of Nogais, beyond the Volga, and found settlements between the Ural and the Yemba. The history of this horde is very fragmentary, and their state was pecoliarly migratory. They do not concern the numismatist, but those who desire the fullest obtainable information about them should consult Mr. Howorth, ii. 1011-1068.
vii. The Line of Jagatai:-Appanage: Mawara-n-nahr (Transoriana, or Bukharia) with part of Kashghar, Badakhshán, Balkh, and Ghazneh, to the river Sind. (1227-1370).
The history of the descendants of Jagatai, in their appanage
north of the Oxus and in Afghanistán and Kashghar, is the most obscure of all the branches of the family of Jingis. Chinese and Russian annals are available for the history of the houses of Tului and Jaji, bat Jagatai's heritage lay too far away to be matter of importance to these chronologists; and even the Persians, who were near neighbours of the Jagatai Kháns, furnish little trustworthy or consistent information. The actual history of the Transoxine Khánate appears to have been singularly uneventful, and beyond occasional raids upon the disputed border territory of Persia, and not infrequent internal troubles, nothing of note is recorded of the family of Jagatai. It has been noticed before how they absorbed part of the appanage of Ogotai after Kaidu's death; the presence of Ogotai chiefs of some power and repute in Mawara-n-nahr is further demonstrated by the accession of two of their number, 'Alee and Danishmendjeh, to the Jagatai throne in the later days when the prestige of Jagatai's family had diminished and rival chiefs began to assert their independence. The history of this later period is exceedingly obscure, and even the order of succession of the Khans is by no means certain, whilst the dates of accession and death are frequently conjectural. The list on page 200 has been drawn up, with the kind assistance of Mr. Howorth, from many authorities, but it can only claim to be provisional and tentative. As a proof of the obscurity which hangs over this part of Mongol history, M. Veliaminof-Zernof's paper on Termashirin and Senjar, in the Mélanges Asiatiques, iv. 137 ff ., may be referred to. The great Timur brought the period of anarchy to an end in 1370 ; but the history and coinage of himself (and the two puppet-khann, Suyurghatmish and Mahmord, of Ogotai's stock, who reigned in his name) and his successors belong to the Seventh Volume of this Catalogue.

## II. THE COINAGE.

Is their coinage the Mongols usually adopted the language of the people they conquered. Thus the Yaen dynasty in China struck coins with Chinese inscriptions, the Ilkháns of Persia, Jagatai Kháns of Transoxiana, and the Kháns of the Golden Horde, all coming into contact chiefly with Mobammadan peoples, issued coins with Arabic inscriptions. Nevertheless, the Mongols had a language and character of their own, and this appears at intervals upon their coins. The number and variety of Mongol inscriptions are, however, very limited, and the following remarks will enable any numismatist to decipher and understand them. The Mongol character (which is formed from the Uighur, a corruption of the Syriac introduced by the Nestorians into Central Asia) is usually written in perpendicular lines from the top to the bottom of the page; but on the coins the position of the accompanying Arabic inscriptions compels us to read the Mongol words horizontally from right to left (like the Arabic), and the convenience of printing makes it advisable to follow the same method here. The alphabet subjoined omits variations indicated merely by points, since such are omitted upon the coins. These variations are the two points $=$ which placed over $k h$ turn it into $g h$, and similarly (but beneath) $s$ into $s h$. The only other pointed letter is the (initial and medial) $n$, and this is sometimes pointed on the coins. In one instance (no. 522) the two dots appear over the gh on the coin.

MONGOL ALPHABET.
Vowels.

Consonants.

It must be observed that several of these characters undergo a process of corruption in the course of the coinage. $\$$ for example is often written $\Delta ; \boldsymbol{\jmath}$ becomes almost $\boldsymbol{L}$, \&c. The inscriptions however are so few that it is not easy to mistake them. The commonest formula is-
gins khaghanu, The Great Khan's
[Viceroy's]
(Khán's name) $\quad M$.or $N . ' s$
veblen deledkeguluk. $\left\{\begin{array}{c}\text { striking } \\ \text { or }) \\ \text { coinage. }\end{array}\right.$
The space for the Khan's name is filled by Abaghain, $\theta$ (Arghunu or
 see below), or

With the accession of Gbázán a new formula was adopted and the preceding one disappears for ever:-

The only Mongol inscription found on the coins of Uljaitu is U Uljitu Sultan: Aboo Sa'eed used
 Suliman Khan, or

Nushirwan wrote his name simply Nushiroan, and possibly used the last-named title as well. On the coins of the Golden Horde only three Mongol names are found-
 Jambag Khan = Janibeg (No. 384); and . . J $N^{-1}$ Tughtamish or Toktamish (No. 522).

These are all the Mongol words occurring in this volume. A few of them require explanation. The terminations in, $\theta$, un, attached to the names Abagha, Arghun, and Baidu, are merely the case-endings of the genitive of the $1 \mathrm{st}, 2 \mathrm{nd}$, and 3 rd declensions, respectively, of Mongol sabstantives.* The words Arinchin Turji, written on the coins of Gaikhatu, both in Arabic and Mongol (ارينجين)
 on that Khán, probably by the Lamas (as in the case of Khubilai's title, Chagrawardi), and represent, according to E. Burnouf, the Thibetan words rintchhén-rdô-rdjé, which mean " precious diamond." They are written ungrammatically, for they should have the genitive termination

The only Mongol words besides the Sultán's or Khán's names are five:
 and ato ; of which one alone presents any difficulty. The translations given above, on the authority of Schmidt, are perfectly apposite. The Ilkháns of Persia, always upholding the fiction that they acted as lieutenants of the Great Kháns of China, would naturally inscribe

[^3]their coins, at least at first, with such words as "the coinage of the Viceroy of the Khakaan," although the inscription might be modified under a later Khán to "By God's power, Gházán’s coinage," as who should say, "Gházán D. G. Pers. Rex," when a less public acknowledgment of the Khakaan's suzerainty was considered sufficient. the genitive case, (which sometimes appears in a blundered or mutilated state) is the past participle of the causative form (to "cause to strike") of the verb eforeto to "strike," and means, therefore, "what has been caused to be struck," i.e. coinage. The other word of the inscription, which has generally been read Cdarugha, or "lieutenant," " viceroy" (Statthalter), is the one difficulty that is encountered in the reading of the Mongol inscriptions. I cannot admit that the word in question is darugha; and since coming to this conclusion I find that the lamented De Saulcy also refused to concur in the usual reading (Journal Asiatique, III. xiii. 124) : but, like myself, he is unable to offer any other interpretation. The word on the coin is quite unlike Schmidt's
 represents the actual appearance of the word on the coins, but the last letters should be, not $\boldsymbol{\mu} \boldsymbol{\theta}$ as the necessities of the type compelled me to print it, but $\mathcal{J} \boldsymbol{\theta}$. After comparing many examples, I am confident that the word is written letter is precisely like the first letter of abagha, which occurs just below it, and is wholly unlike the first letter of which stands lowest of all on the coin. The first letter is therefore not $d$ but $a$. Of the second being
$r$ there is no dispate : but it is succeeded by a single stroke which is omitted in Schmidt's spelling of Cout but is undoubtedly present on every coin, and must be transcribed as $a$ or $n$. Then follows the combination $\mathcal{f} \boldsymbol{\theta}$, which begins with $b$ or $u$, and ends with a sign which does not belong to the Mongol alphabet as printed in books, and for which no probable interpretation at present suggests itself. Whatever the end of the word may be, the first four letters are arnu or arab, and not daru(gha).

Three characters occur on the coins of Gházán which are neither Mongol nor Arabic. They appear at the left side of the inscription of the reverse of thirty coins, varying in date from 696 to 703 of the Hijreh; and though the engraver has sometimes executed them in a rough and corrupt manner, the forms of $\nsim$ these signs are coustant, and may be reproduced thus: if Schmidt regards them as Thibetan, but admits that they are to be read as such " nicht mit voller Sicherheit." \X He says, "Der erste ist ein vollkommenes tibetisches Tscha, der zweite kann kra oder gra and der dritte ra gelesen werlen. Es könnten diese drei Charactere Tschakrarádsh bedeuten und auf den Titel des Gross-Chans Bezug haben, dessen auf diesen Münzen (gegen die Gewohnheit) sonst keine Erwähnung geschieht. Chubilai erhielt von den tibetischen Lamas den indischen Titel Tschakrawarti (Weltherrscher, oder der das [Welt-] Rad Drehende ; mongolisch : Kürdüni Ergiguläktschi) und wird, wo von ihm in mongolischen Büchern vorkommt, überall Tschakrawarti genannt. Zwar lebte Chubilai nicht mehr zur Zeit der Regierung Ghasan's, sein höchster Ehrentitel kann aber, als den Gross-Chan bezeichnend, fortwährend in Gebrauch geblieben seyn." *

[^4]The explanation just quoted is halting and far-fetched; but it is open to a much more scrious objection. The letters in question are not Thibetan letters. M. Terrien de LaCouperie, who has devoted much labour and genius to the study of Asiatic Alplabeta, and has kindly investigated this question for me, states-" Les trois signes ćtranges que portent les monnaice en yuestion de Gházán sont en écriture Bachspa Ils forment sans nul doute la marque (nischan) 'difficile à contrefaire'* qu'il fit graver sur le nouveau coin (sikké) à l'aide duquel il expérait remédier aux inconvénients croissants de la fausse monnaie et de l’agiotage. Glázán, dont la facilité pour les langues et l'instruction en fait d'histoire sont bien connues, avait eu pour instituteur un bakschi chinois, qui lui avait cnseigné les alphalets Uigur et Mongol. $\dagger$ On ne saurait done être surpris de le voir se servir d'une écriture faite spécialement pour le Mongol sur l'ordre de Khubilai Khân par le lama Bachspa et publiée par décret impérial en 1269, avec injonction de l'employer pour tous les documents officiels. $\ddagger$ Pendant toute la dureé de la dynastic (Yuen) que ce grand souverain avait fondé en Chine, nous avons des traces des efforts incessants par lesquels ses successeurs essayèrent d'établir rígnlièrement l'emploi de cette nouvelle écriture. Mais ce fut en vain; et lien que nous agons jusqu'en 1354 des monnaies à lígronde Bachspa, il avait fallu dès 1286 tolérer l'usage de lancienne écriture Uigure, qui, perfectionncé successivement §,

nombre de monnaies des Yuen par lesquelles nous connaissons plusieurs variantes des caractères. En comparant ces variantes et en tenant compte de la différence entre le style lapidaire des inscriptions et les formes plus lâchées d'une écriture relativement carsive, on reconnaitra de suite que les caractères inconnus des monnaies de Gházán appartiennent à cette écriture. Le premier signe surtout est frappant de ressemblance avec la première lettre de la syllabe Mas équivalente du signe cyclique 卯 des monnaies des Yuen. Mais il n'y a pas lieu d'y chercher une indication de date puisque les mêmes signes Bachspa figurent sur des monnaies de Gházán de plusieurs années. Les deax signes suivants bien que d'un aspect moins frappant que le premier, à cause de leur tracé cursif, ne nous offrent pas de difficulté et se lisent $K h a$ san, transcription aussi exacte du nom de Ghazan que le permettait le syllabaire Bachspa, qui de même que son prototype tibétain n'avait pas d'aepirées sonores des différentes classes qu'il remplaçait par les aspirées sourdes. Les deux derniers signes nous donnant le nom de Ghazan, nous induisent à considérer le premier signe Mfa comme une abbréviation du nom de Mahmud, qu'il avait assumé en montant sur le trône."

With the exception of the Mongol inscriptions and the Bachspa or Bashpa transcription for which M. de LaCouperie has found so satisfactory an explanation, the coins of the Mongols present no linguistic difficulties to the Arabic student.

The Arabic character employed on the coins of the Mongols varies from stiff square Koofee to ornamented Naskhee: examples of square Koofee arranged ornamentally are found in AbooSa'eed's coinage, and on a coin of Nushirwán.

The coinage of the Great-Kaáns is represented here only by its Persian issues: the currency of the Yuen dynasty, in Mongol and Chinese, belonging to the Chinese and not the Arabic series.* The earliest coin of the Mongols with Arabic inscriptions, and probably their earliest with any inscriptions, is that struck at Tiflees in the year 642. We know that Turakina, the empress, who governed the Mongol kingdoms in the interval between her husband Ogotai's death in 639 and the general Diet which was held in 644 for the election of Kuyuk, appointed Arghun to the governorship of Persia in the place of the former governor Kurguz. This coin of 642 may have been issued by Arghun on his arrival. Or it may have been struck by some pretender to the throne, who considered the interregnum, and the dissatisfaction caused by Turakina's rule, a favourable opportunity for striking a bluw for sovereignty. The coin (or rather two coins, for there is a second with mint and date probably Kenjeh, 642 $\dagger$ ) bears the familiar Anatolian and Georgian device of a mounted bowman, with dog, and presents no indication of the striker's name except the obscure inscription الغ منقل الوش نيك (thus pointed on some of the coins) which has been interpreted in more than one way. M. Bartholomaei $\ddagger$ points the last word بيك, and regards Alush Beg as the name of the Viceroy at Tiffees under Turakina. We know, however, that the name of this Viceroy was Arghun, and the attribution of the name Alush Beg to him must be regarded as extremely

[^6]doubtful, whilst Langlois' suggestion that the name may belong to Temojin Utsuken, brother of Jingis, is hardly worth considering. Prof. Grigorieff * omits the points which on some of the coins are placed over the الوس (الغ منغل الوس نيل " (coin) of the great Mongol Ulas:" an explanation which satisfies the sense, though it partly interferes with the actual pointing of the inscription. As, however, the pointing varies on different specimens, +M . Grigorieff's reading may probably be the correct one.

Of Kuyuk the British Museum collection has no coin, except those issued in his name by his rassal Dawith V. of Georgia, which do not belong to the Arabic section of the Catalogue." Mangu's name ( $=$ ( Möngké) occurs alone on five coins, and in conjunction with Hulagu's on seven more. The former (with dates 652 and 653) were probably issued by the governor of Persia, Arghun, who apparently held Tiflees for some time after, as well as before, Hulagu's invasion. Hulagu's coinage begins in 652, but we must regard the copper coin issued in this year with his name as rather a symbol of the terror caused by his advance than as an actual issue of his own mint, for El-Mósil was not yet taken in 652. The coin was probably issued by Lalu, whoee type it bears; and the fact that the two following coins appear to have been hastily struck over old issues of Lulu confirms this view.

No name of any Great-Kain appears on the Persian coinage after Mangu's death; but the vassalage of the Persian Ilkbáns was none the less adnitted. Khubilais supremscy is allowed on Hulagu's later coins in the words قآن الو'عغمر , in contrast with Hulagu's lower title إيلنـان الهعنمر. This, or some equivalent acknowledgment of dependence, was expressed on the

[^7]coins of the various Ilkháns, up to the time of Gházán, i.e., throughout the reign of Khubilai : but with Gházín's accession, shortly following Khubilai's death, the cuatom was dropped, and the coins no longer bear any reference to the distant Great-Ķán.

The series of coins of the Ilkháns, or Mongols of Persia, in the British Museum, is large and comprehensive. It consigts of nearly 350 coins, of which three-fourths are silver, only 13 being gold, and 75 copper. Every Khán from Hulagu to Nushirwán is represented, except. Arpa and Moosá, whose reigns together did not amount to eight months. In the fine series of Arghun's coinage only one year of his reign is omitted, and only two in Gházén's, whilst the two hundred examples of AlooSa'eed's mints represent every year save one from 717 to 734 ; and many years are recorded hy the issues of several different cities. The value of the coins in fixing the duration of each reign is especially seen in the issues of the puppet Kháns who were set up by the rival ameers from 736 to 745. Thus Mohammad (736-8) is represented by coins of 737 and 738; Toghd-Timur, 738, 739, 741 and 74x; Jehén-Timur, 740 ; Sati Beg, 739, 741, 74x ; Suleymán, 740, 741, 742, 743, 745, and perbaps later dates, unless nos. 336-340 (with only
 more properly to Nuchirwán; and Nushirwán, 747, 754, 756 ?

The Arabic inscriptions on the coins of the Mongols of Persia present little that is remarkable. The religions formulas generally consist of the ordinary $\overline{\sum^{-}}$إله with variations in the conclusion : صلى اله عليه, \&c. The marginal inscription ased by Hulagu and Abaga, فل التهرَ مالك ولك الهلك تؤتى الهلك من تشاء وتنزع الهلك مهن تـثاء وتعزّ هن تشار وتنل من تشار بيدك النغير $f$ تهن peculiar, both in rarity of occurrence, and in the briaking-off at الخغير, omitting the end إنّك على كز شي قدير : the same formula is found on the coins of Benee Naṣr of Granala
(cf. vol. ii. p. 47). Gházán was an ardent Shiya'ee, yet the formulas of the house of 'Alee do not appear on his coins, and first come to light under Uljaitu, on whose coins we find not merely على ولى الله , but the whole list of the Twelve Imáms in the

 sionally the Shiya'ee formalas بسم الله الرّعمهن الرّهصيم, and .العهد لله ربّ العالهين . The first silver coin of Uljaitu is a most remarkable piece. It bears two Kurán inseriptions (xlviii. 29 and xxiv. 54) which are not found on any other coin, and also the formula of the four orthodox Khaleefehs أبو بكر الصّديت وعهر الـفـاروق وعـثـهـن ذو النّورين وعلى أيو السّبطين عليهر التّلام جمعين . The names of the four orthodox Khaleefehs, without these epithets however, occar commonly on Uljaitu's and Aboo-Sa'eed's coinage, although the highest place was awarded to 'Alee. Another unusual Kurán inscription is فسيكفيكهر الله وهو السّهيع العليمر (Kur. ii. 131), arranged in an ornamental border on Aboo-Sa'eed's coins (e.g. no. 175), where also occurs the verse from Soorah lxvii. 1, تبارك , الذّى بيده الهلك ومو على كلّ شیء قدير no. 219 with the words مسبنا الله prefixed. Other religious phrases on the Ilkhán coinage are بسمر الله الكريم or الله , لله الأمر من قبل ومن بعد , الحهد الله , الهنّة لله , العـظيمر (of which the reading نعمر النّصر من اللّ beneath rev. area of looped-square type of Aboo-Sa'eed is not خلّد اللّه absolutely certain); and the benedictory formulas خلّد , خلّد الله ملكه ورولته , خلّد ملكه , ملكه (nos. 280, 288) خلّه .يُدْلِ عَظِيمًا (no. 260), and رضى عنه , الله سلطـانه

The Arabic titles on the coins of the Mongols of Persia offer scarcely any variety. قآن الأعظم is the title given to the Great-Kaán or Khakaan (Mangu or Khubilai), and خمان Khán
at first, and إيلـطان الهعظظم afterwards, to his Persian representatives. Hulagu himself changed his own title from غان to إيلذان المعظّم, the former being used during Manga's reign, and the latter during Khubilai's. Abaga, Ahmad, and Arghun used the latter title, as well as the Mongol title, but the first on his earlier coins inscribed no other title than قاآن العادل, which probably referred to Khubilai, in which case Abaga's own title does not appear on these coins. Gaikhatu and Baidu have only Mongol titles. Gházán as a rule uses no title, and simply inscribes himself [By the power of God] Gházán Maḥmood [Ghasan's coinage], the bracketed words being in Mongol character; on one silver coin (no. 120), however, he calls himself سـلطان الزُعظرغازان سلطان مـهمور, and on two copper coins he uses the title غازان قآن مسعهود, whereby it appears that the discontinuance of the insertion of the Great-Kaán's title was accompanied by the assumption of the hitherto superior title قآت by Gházán himself. Uljaitu is the first to indulge in the luxury of many names which Mohammadan sovereigns commonly affect: his titles are الهولى السَلططان الأعظمر مالك رقاب الأممر أولجايتو سلطان غياث الدّنيا والدّين , comprising a curious mixture of Arabic, Persian, and Mongol words, which do not, however, all appear on every coin. Aboo-Sa'eed's ordinary appellation is السّلـطلــان部 is sometimes prefixed,
 in one instance قاسن أعظمر (sic) occurs; whilst on many coins only a short selection from these titles appears. With the lesser Kháns who followed Aboo-Sa'eed, السلطان alone, or followed by العادل, العالم , or (once) (once) الؤعظمر, suffices; and is only added after Suleymán's name. Even Sáti Bes, though a woman, does not change the title.

Forty-seven known tuwns appear as mint-places on the cuins
of the Mongols of Persia, besides the following eleven, which

 (perhaps * a form of بوزبان), شاكان (which I believe to be an inversion of كاشان), كسر شـهغ (apparently Sheykh Kebeer), كيز ? Mints sometimes appear with and sometimes without the definitive $ل$ and موصل , الباران (see note, p. 81) and بصرة , الهوصل and and أرزن appears in the abbreviated forms ألريرة and is prefixed occasionally to the names of towns such as تبريز and كاثشان , and الهـرووسـ is appended to ماردين. It is noteworthy that although Uljaitu is stated to have laid the foundations of Sulténeeyeh in 704, a coin bearing that mint-name (with l'prefixed) occurs among Gházán's issues, without date indeed, but presamably not later than Gházán's death in 703. The coin, however, is double-struck, and may have been merely an old coin used for the new city and restruck.

The mint and date formula, which is full in Hulagu's time, becomes more and more curtailed as the series advances. At first we find the usual phrase ضرب مذا التّرمر ب prefised, and on four coins (nos. 21-24) of Hulagu the word الدّرمر is qualified by the epithet الهبارك. Very soon, however, the unnecessary words are dropped out, and we find ضرب بغداد, , فرب تبريز, and the like, with the verbal noun instead of the verb, and without any denomination or preposition. "Coinage of Tebreez" was found to serve all the purposes of the more tedious phrase, "This dirhem was struck at Tebreez." The date is often put in a different place from the mint, and فی is generally omitted before

[^8]numeral words, not ciphers, with one exception (no. 129), in which the unit is a cipher. The month (with or without فى) is not infrequently prefixed to the word , or sometimes the expression فی شهور سنة is adopted (no. 91, 121a, 128, 175, \&c.).
 sometimes used by Uljaitu, prefired to his own title on the reverse area, and the second and third of these phrases are similarly employed by Aboo-Sa'eed. The three coins bearing the inscription عدلية شبراز are very noteworthy, but I leave the interpretation of the expression, which I take to represent , to the consideration of my friends, Professor Stickel and M. Tiesenhausen. The dates are always given from the era of the Hijreh, except one gold and fifteen silver coins of Aboo-Sa'eed, which all bear the date year 33 of the Khánian Era, which was established by Gházán on the 1st of Rejeb, 701 A.. ., but only appears on the coinage in AbooSa'eed's time. On the few overlapping dates in the series of coins of the Mongols of Persia, see notes to pp. 11, 12, 18, 29.

The inscriptions on the coins of the Mongols of Persia are often arranged in geometrical borders, sometimes of a complicated character, and in some cases the border may help to determine the date (see note to p. 62). The surface of the coin is commonly adorned with numerous points, stars, and ornaments, none of which seem of any special import, and of which none have therefore been noted in the Catalogue. The same remark applies to the numerous blunders of the engraver which are noticeable in this series: it would serve no useful purpose to record them. As a rule we do not find figures of animals or men on the coins of the Ilkhans; and with the exception of the peacock on some silver coins of Arghun, such figures when they do occur are found only on the copper issues. The head and cross-legged figure common on the coins of the Atábegs of El-Mósil are also found on the early copper
pieces of the Ilkháns; and the Two-headed Eagle of the Benec Zengee and the Urtukees appears on an Irbil coin of Abaga: the dragon, lion passant, lion and sun, peacock, ibex, hare, and radiate sun, are also among the figures that are found on the copper coinage of the Mongols of Persia.

The weight of the Ilkhánian coinage evidently underwent several reforms. The few gold coins will scarcely serve to prove any theors, but their weights are fairly normal, 63 to 70 grs . for the deenár, and 133-8 for the double deenár; AbooSa'ced's being rather lower. The dirhems, however, present a systematic order of changes. At first they have very nearly the normal dirhem-weight of the time, averaging 38-40 the dirhem, and 18.2 (for 19 or 20) the half-dirhem. Under Arghun the average falls to 37 , and we know that a financial crisis occurred in Gaikhatu's reign, and an attempt was made to force a paper currency on the people. Under Gházán and Uljaitu a new standard appears:* the dirhem seems to have been assimilated to the deenár standard, for we find a general average of $16 \cdot 5,33$, and 66 , for half-dirhem, dirhem, and double dirhem ; and apparently a six dirhem piece was in circulation, of a weight of 198 grs. Aboo-Sa'eed, again, made a new change, for his pieces average 54,25 , and $163-179$, from which it would appear that his standard dirhem weighed 55 grs., the half $27 \cdot 5$, and the triple dirhem 165 . The period succeeding Aboo-Sa'eed is scarcely worth taking as evidence of standard: the metal was debased, the size reduced, and the weight irregular.

The coins of the Khans of the Golden Horde in the British Museum number more than two hundred and twenty specimens, all silver, except nine copper pieces, but present very little of interest or variety in their inscriptions. Their size is

[^9]very small (average diameter 65 inch), and the weight is proportionately reduced, and appears to represent a standard dirhem of 24 grs . The little space for inscriptions is further diminished by the geometrical borders in which they are usually set. Very few religious formulas are found on them (only in لو إله إلע الله وحده and ل لالشريك on the earlier coins, scarcely ever occurring after Uzbeg's time, and الهلك لله الواهد and three doubtful and obscure inscriptions), and the two sides are generally occapied, the one with the name and title of the Khán, the other with the mint and date of the coin. The titles are generally very
 العادل are the forms employed, the last becoming almost universal among the later Kháns, when also the benediction خلّ خارن is appended. Very commonly no title but اللّه ملكه appears; and in some cases this is involved in an ornamental monogram. The occurrence of the name of Jani-beg on the coinage of Azeez (p. 161), with the epithet المرعـوم (nearly corresponding to the German expression der Selige) "the deceased," is the only noteworthy fact in relation to the titles occurring on the coins of Kipchak.
The mint and date formula is reduced to its smallest dimensions. The noun ضَرْب is used, the preposition is generally omitted before the mint, and ${ }^{\text {d }}$ is often dropped before the date; even سنة does not always occur, and the date is given in Indian ciphers, which the engraver commonly reverses or inverts or otherwise misplaces. The Mints of the Golden Horde are important as factors in the problematical history and geography of the family of Juji. The following is a list of the mints occurring on the coins of each Khán in the British Museum Collection :-

|  | 1 | 1 | 1 | 1 | 1 | 1 |  | $+$ |  | 1 | 1 |  |  | 1 | 1 | 1 |  |  |  |  | 1 | 1 | 1 | 1 | 1 | 1 |  |  |  | Grate Or |

Besides these mints, Sighnák, the capital of the White Horde, occurs on the one piece of Urus Khán in the collection. Hájji, for Héajji Tarkhán, occurs once on Toktamish's coinage; and Beled, probably meaning Krim, on that of Beg Pulad. One coin, bearing the name Mohammad, and mint Ulus Bulghár, I believe to have been struck by Ulugh, not Kuchuk, Mohammad.

Several of these mints are undoubtedly synonyms of others. On a coin of Murid Khán (no. 474) we find the words كلستان للسراى "Gulistán for Serái," and there can be no doubt that Gulistán, or "Rose garden," was a name given to Seriii, and it is probable that Ordu, which means simply "Camp," was another name of the old capital of the Golden Horde. Similarly, the later and more splendid capital built higher up the Volga, and generally known as New Serái, or Great Serái, or Janibeg's Serái, was also designated on the coins New Gulistán, and probably New Ordu and Great Ordu are names also applying to it (see Howorth ii. 184 ff .). When two names of the same Serái occur in one year with the name of the same Khán, we must conclude there were two issues from the mint in the same year. A third Serái is found among the Golden Horde mints : Seráï Chuk (for Kuchuk) or Little Seráī, built by Batu on the Yaik or Ural. Hájji Tarkhán, which becomes the principal mint towards the close of the power of the Golden Horde, is the city on the Caspian now known as Astrakban. It was destroyed by Timur, and rebuilt on a different site, and to this new city the mint New Hájij Tarkhan, occurring on a coin of Shadibeg not in the National collection, may refer. Bulghár, or Bolghari, on the left bank of the Upper Volga, was the chief mint of the Kháns of Kipchak in the early days of the Khánate, and it remained long the second town (after Seraí) in their dominions. Its series of coins are imperfectly represented in the British Museum; but are known to extend uninterruptedly from Batu to Kuchuk Mohammad.

The ornaments of the Kipchak coinage are few and insig. nificant: the damghah, however, of Batu, or Bereke (crossed by the $\dot{j}$ of on the obv.) $\geqslant \sim$ should be compared with the Persian coins bearing Mangu's name, whereon a
 $\cap$, which is found on many of the earlier coins of the Golden Horde, probably has some signification, and the same may be said of the JI which occurs on the coins of the Krim Kháns, and which, together with the practice of dating from the year of accession used by Shahin Girai, are the only noteworthy points about the short series of Krim coins here described (pp. 194-9).

Of the Jagatai Kháns the National collections possesses but three coins, struck by Danishmendjeh and Buyan Kuli, of whom the former was of the stock of Ogotai, though he sat on the Jagatai throne and employed the Bukhárá mint. Buyan Kuli struck at Otrár (?). Except that each of these princes called himself (as might be expected in a line that never owned the sovereignty of the Supreme Kháns descended from Khubilai), there is nothing remarkable in their coinage. The two coins of Hoseyn, Kert chief of Herat, and nominal vassal of the Jagatai Kháns, are more noteworthy. The names and epithets of the four Orthodox Khaleefehs appear in the obv. margin, with the unusual form عثهان أبو نورين instead of دو النورين ; whilst the rev. margin presents the curious date formula .عن أمر قان فى سنّة فى بلدة هراة ضائها الله D'Ohsson and De Guignes enable us to attribute these coins to Hoseyn Mo'izzed-deen, who in 752 (A.D. 1351) was compelled by the Ameer Kazgan to acknowledge the supremacy of the Jagatai Khán, Buyan Kuli, and to do homage to bim at Samarkand. The coin struck in this very year is a notable testimony to this act of submission, which
the words عن أمر قان indicate in a sufficiently emphatic manner.*

The petty dynasties that sprung up on the rains of the Mongol empire in Persia, and lasted to the coming of Timur, are appended to this volume. They consist first of the Jelairs, who after setting up various puppet Kháns on the throne of Hulagu, finally asserted their own title to sovereignty, and founded a Dynasty which ruled a large part of Persia for nearly fifty years, and even returned to claim what Timur had deprived them of when that conqueror died in 807. Side by side with the Jelairs was the dynasty of Mahmood Sháh Inchu, of which Mr. H. C. Kay has treated excellently in the Numismatic Chronicle (N.S. vol. $\mathbf{1 v}$. 216-230). Mahmood Sháh was made governor of Fars by $\mathbf{A} b o o-S a ' e e d$, but at what period of his reign is uncertain. He was executed by Arpa Khán in 736 ; but his son Aboo-Ishák raled at Sheeráz in great splendour from 743 to 754 , and appears to have exercised authority at Kázeroon (fifty niles west of Sheeríz) as early as 719. In 754 Aboo-Ishák was ousted by Mohammad of the race of Muḍhaffar, and in 758 was put to death at Sheeráz. The Muḍhaffarees form the third of the dynasties that divided Persia among them. Their province was Kerman, and they added thereto Fars in 754. A petty line of insurgents in Khorasán, the Serbedarians, close the volume with a very remarkable coin.

A word must be said about the spelling of Mongol names in this volume. It was felt that they would hardly be recognized if strictly transliterated according to the system adopted for Arabic names, and they are therefore spelt in the ordinary and anscientific manner sanctioned by long usage. As a rule

[^10]I have followed Mr. Howorth's spelling, except where it is strikingly inconsistent, and I believe that this course will commend itself to most students. Indeed it is difficult to adopt any system when the Mongol letters are differently transliterated by each scholar, and much uncertainty seems to exist as to their precise value. For example, Hulagu ought to be spelt with the same initial letter as Khubilai ; yet the former certainly had the soft sound of the spiritus asper, or why did the Persian coin-engravers invariably represent it by (مولاكو), instead of by the spiritus asper faucalis $c$ or fricatus $\dot{C}$ ? This is enly one example of the many difficulties that beset the proper representation of Mongol names in Roman characters.

In conclusion I must offer my most sincere thanks to my friend Mr. Howorth, withont whose invaluable History this Volume could scarcely have been undertaken, and without whose personal help and kind revision of the proof sheets much that is now right would have been wrong. My acknowledgments are also due and gratefully tendered to M. Tiesenhausen, M. H. Sauvaire, Prof. Stickel, and M. Terrien de LaCouperie, for valuable notes and assistance.

STANLEY LANE POOLE.

December 1sth, 1ssu.

## CORRECTIONS.

P. 35, no. 91, dele Pl. III.
,, 47, nos. 131, 132, dele but no outer margins.

\footnotetext{
A regular order may be discovered in the modes of inclosing the in. ascriptions on Aboo-Sa'eed's coins, and the approximate date of a coin may thus be safely determined by its borders. After beginning with a hexagon type (no. 175, af. 717), Ibo Sa'eed adopted the lonped-square on rev., which lasted from 717 to 722 (nos. 171, 176-196); during the year 722 the rev. was unclosed in a pentagon (nos. 197-208) ; but in 723 we find the plain-square type introduced, and lasting till 728 (or possibly i3r, nos. 209-214). About this time, several other types were employed-the lozenge, circle, octagonhexagon, and twn-octagon types, carrying the series on to 733, when a bilingal type with a square Roofer instr. on the obs. was introduced, which lated till the end of the reign 4.H. \(73 \mathrm{~m}^{\prime}\) (nos. 235-249), with the exception of an octagon type in 734 (no. 174).
+ This inscription is arranged round the central formula in a very remark. able manner. See Plate IV. no 177.

Author Lane-Poole, Stanley.
~~~~~

[^0]:    - It will be simpler thas to indicate roughly the position of the campinggrounds of Ogota1's subjects, than to say "the clans camping in or about Zungaria," etc. In thif instance the tribes in question were the Naimans and the ancestors of the modern Kalmuks.

[^1]:    - In a letter to me Mr. Howorth has since generously conceded this point.

[^2]:    - I think not the Beg Pulad who struck esins between the tivo inroads of Timur, as Mr Howorth -uppodes [11. 249. 266]. Bis Pulad nas a general of Toktamin's army : but Pulad was of the hostif. stock if Crus

[^11]:    * Some coins of Khubilai's house, i.e. the Yuen Dynadty, will be deacribed when the Catalogue of the Chinese series is publiolued.

[^12]:    * Killed, 738.
    † Toghá Tımur had beforo (i37) been proclaimed Khán by the Khorasán Ameers, but withont success. Hasan Buzurg touk up his cause in 739, aganst Satı leg, the puppet of the rival house of Chúpán, but soon dropped it, and set up Jehán Timur, only to depose him again in 741, after which the Ilkhanian set up no more candidates for the Mongol throne. Toghá Timur, however, continued tw Luld out in Khorasán till 752 (13J1).
    I Hasan Kuchuk married Sati Beg to Suleymán and made the latter Khán in 740 , and maintained him till his own death in 744 ; soon after "hich bis brother, El-Melik El-Athraf Chupánín set up Nushin"anfor a tume.
